Coming home / by Jack McDevitt. New York, NY : Ace Books, 2014. 813.54 M14c

One Kick / Chelsea Cain. New York : Simon & Schuster, 2014. 813.6 C12o

Luminaries : a novel / Eleanor Catton. First United States edition. New York : Little, Brown and Company, 2013. 823.92 C28L

"The Digital Renaissance teaches you how to translate the methods and skills found in traditional art to the digital medium. By covering fundamental painting principles and the basics of digital software, before moving into tutorials that break down key techniques, professional artist Carlyn Beccia teaches you how to use the tools at hand to paint your own works of art. Each chapter showcases one great painter and analyzes the techniques that set each one apart. These techniques are then imitated in step-by-step tutorials, allowing you to achieve amazingly convincing results and bring your own work to new creative heights."--publisher description.

000 and 100– General Works, Computer Science, and Philosophy

“Lao-tzu's Tao Te Ching, or Book of the Way, is the classic manual on the art of living and one of the wonders of the world. In eighty-one brief chapters, the Tao Te Ching flods at the basic predicatment of being alive and gives advice that imparts balance and perspective, a serene and generous spirit. This book is about wisdom in action. It teaches how wo work for the good with the effortless skill that comes from being in accord with the Tao (the basic principle of the universe) and applies equally to good government and sexual love, to childrearing, business, and ecology.” –publishers description

Leave your nose ring at home: get the job you want by creating a powerful first impression / by Joe Swinger; [foreword by Ron Fry]. Franklin Lakes, NJ : Career Press, 2006. 650.14 Sw5L

“In this book, the author, a neurologist, tells the stories of patients with a variety of neurological disorders, some familiar (epilepsy, chronic fatigue, stroke, memory loss), and others relatively mysterious (narcolepsy, chronic déjà vu, compulsive fidgeting, Creutzfeldt-Jakob disease). Chapter by chapter, he reveals the various levels of the brain, from the atom to the mind, and explores what happens when workings at each level go awry. Readers, even those with no special knowledge of medicine or science, are taken to the very frontiers of current scientific knowledge. The author elucidates the workings of the brain in astonishing detail, weaving together fascinating case histories as well as clear accounts of concepts and discoveries in neuroscience. Also considered is what the brain's behavior and misbehavior can tell us about the human self as physical system, living creature, and conscious mind. In a final chapter he reflects on the place of the mind in nature.” - publishers description
